

Technology and Innovation

Technology and innovation are critical enablers to ensure the future sustainability of the Australian red meat and livestock industry. Research and development (R&D) is a large industry focus, supporting continuous improvement through best practice and innovative technology and tools.

Advanced packing and processing

Innovative automated feed management

Revolutionising farm management

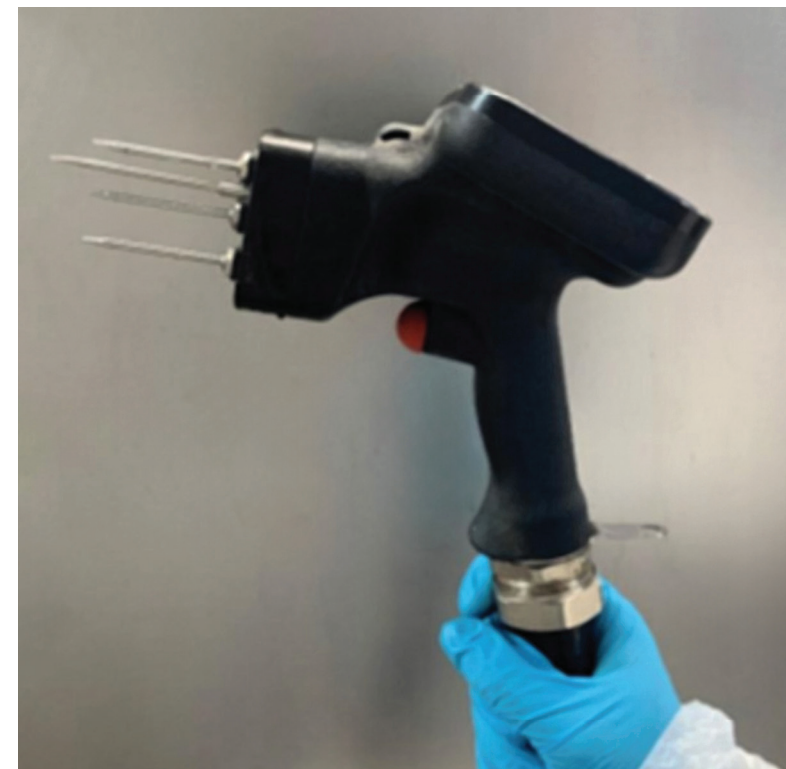

Improved health and welfare practices

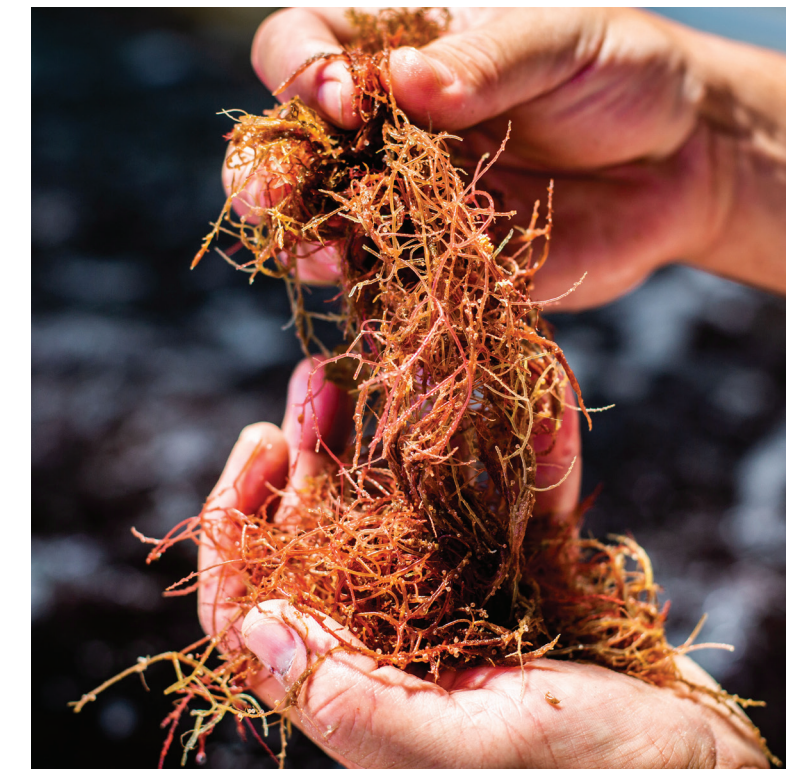

Advancements in food safety and traceability

Investment in livestock genetics R&D

Development of precision tools

Feeding R&D to target climate challenges

Developing energy-saving technologies
