

Pest or not? That is the question

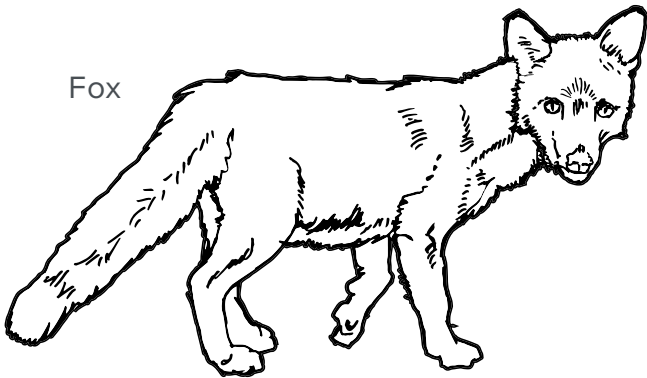

Below, and on page 2, you will find several animals that may be found on a sheep or cattle farm. Some of them are pests and some are not.

Cut them out and sort them classify them as pest or not. On the back of the animals classified as pests, write some information about the problems this animal causes for cattle and sheep producers and how they might address this. You will need to use your research skills to find this information.

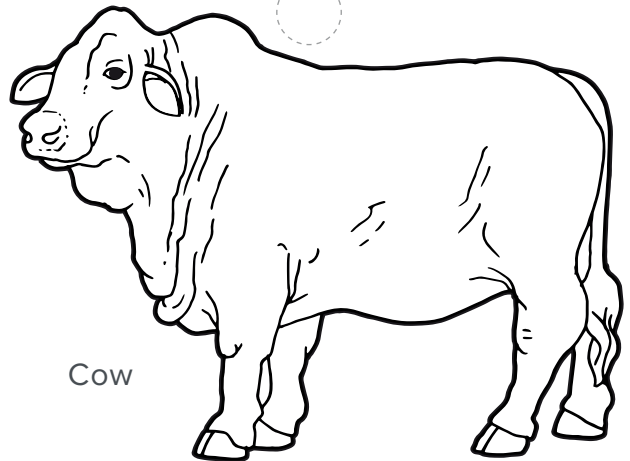

Once you have finished, Hang the animals from a piece of string to make a pest mobile.

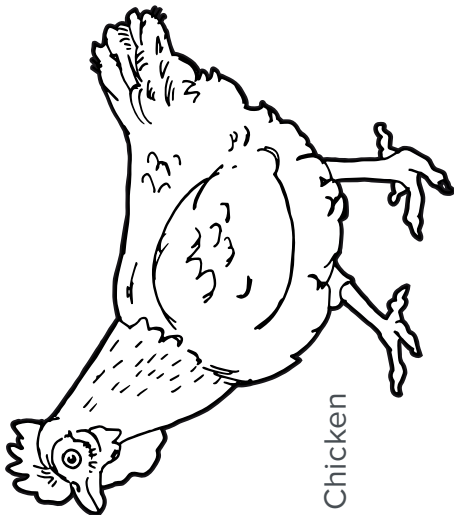

Fox

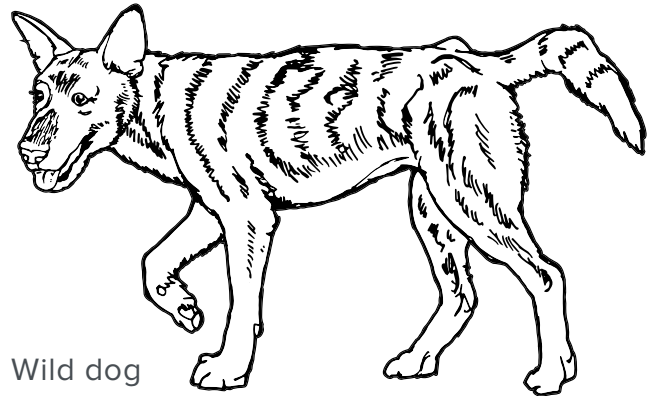

Cow

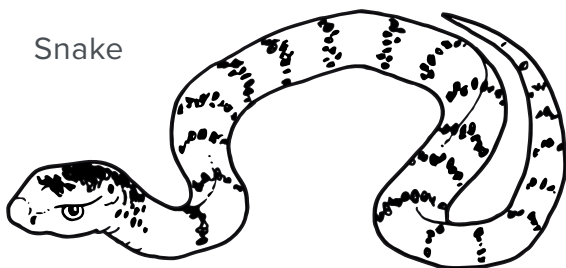

Chicken

Wild dog

Snake

Feral pig
